RE: High Street United Methodist Church (HSUMC)

Dear Mrs. Rabil:

In regular session on August 25, in accordance with the provisions of paragraph (h) of that certain agreement with the City of Franklin titled, "Waterline Extension Agreement for Riverdale Elementary School," the Board of Supervisors unanimously resolved to permit HSUMC to connect to the 12" waterline on the north side of Camp Parkway, at its option and expense.

As we previously discussed, HSUMC may also connect, at its option and expense, to the gravity sewer line planned to serve Riverdale Elementary School. We have recently executed a design-build contract with Southampton County Infrastructure, LLC to design and construct the improvements, which are expected to be in service by late 2009 or early 2010. Final alignment of the sewer line has not been determined at this writing – I anticipate, however, that the sewer line will also be located on the north side of Camp Parkway, and will include several laterals to the south side at strategic points along the way. Once the final alignment is determined, I'll be back in touch with you.

Prior to applying for building permits, HSUMC will need to submit to me four (4) sets of detailed drawings, illustrating the proposed plan and profile for all off-site utilities necessary to serve the church (the casing and lines beneath Camp Parkway). Upon completion of construction, the off-site utilities located within the public right-of-way will be dedicated to Southampton County for perpetual operation and maintenance.

With kind regards, I remain

Sincerely,

Michael W. Johnson
County Administrator
